

ABSTRACT AMENDMENTS

Amend the abstract found on the last page of the specification as filed as indicated on the following separate page by underlining, strikeouts, or double bracketing.

Abstract:

~~{PROBLEMS}~~ To provide a oblique contact double ball bearing and a pre-load adding method for the ball bearing capable of easily adding the pre-load by performing adjustment for adding the pre-load in a wide adjustment range.

~~{MEANS FOR SOLVING PROBLEMS}~~ In this oblique contact double ball bearing, clearances between balls ~~[(18)]~~ and raceways ~~[(11b)]~~ and ~~[(13b)]~~ on one row are made different from clearances between balls ~~[(17)]~~ and raceways ~~(11a) and (13a)~~ on the other row so as to apply a thrust load to inner and outer rings ~~(11) and (13)~~, and add the pre-load to the inner and outer rings.
